Canson Infinity Baryta Prestige II 340gsm has the aesthetic of a traditional darkroom paper, which is achieved by adding a coating of barium sulphate prior to the inkjet receiving layer. The paper has and a natural white base which is achieved without the use of artificial brightening agents (OBAs). The gloss finish of Baryta Prestige II enhances the deep blacks and pure whites and intensifies the vibrant colour gamut. The paper offers exceptional image quality, detail, and tonal range to produce superb black & white and colour images. Produced on a mixed alpha-cellulose and cotton base, the paper has excellent handling characteristics and is FSC and ISO 9706 certified.
